

RECYCLING SOAP SAVES LIVES

10 Minutes

Prepare:

Gather your Team Members. You will need the sample soap bar and hygiene kit included in your Clean the World Welcome Kit.

Ask:

Did you know that by recycling the used soap bars and amenity bottles from our hotel, we can help save the lives of people around the world?

Teach:

Through our participation in Clean the World's Hospitality Recycling Program, over 63 million bars of recycled soap have been distributed to those in need in local communities and around the world contributing to a 60% reduction in hygiene-related diseases.

Diarrheal diseases and pneumonia are the top two killers of children under the age of 5. **Hygiene-related diseases (diarrheal and pneumonia) account for 1 in 4 child deaths worldwide.**

Clean the World grinds and reprocesses our used soap into brand new bars that are distributed to those in need.

Clean the World also collects used shampoo, conditioner and lotion bottles. These bottles are either recycled or converted to energy.

Since 2009, Clean the World has distributed more than **63 million bars of soap to 127 countries.**

Activity:

Let your team pass around the sample Clean the World soap bar and hygiene kit.

Brainstorm ways that you can share the Clean the World program and with Guests.

Resource:

Check out cleantheworld.org for more information.

Tip:

All soap and amenity bottles are to be recycled - our commitment is zero soap to landfill
