

Clean the World®

## Recycling Soap Saves Lives (Housekeeping Team Members)

**10 minutes**

### Prepare:

Gather your Team Members. You will need two Clean the World bins (one green and one blue) and the sample soap bar and hygiene kit included in your Clean the World Welcome Kit.

### Ask:

Did you know that over 5,000 children die every day because they do not have access to soap?

### Teach:

By collecting soaps and amenity bottles (shampoo, conditioner, lotion), and shipping them to a Clean the World facility, you can help reduce waste from landfills while saving lives.

The Clean the World program is easy! Simply collect the soap and amenity bottles.

- Collect used soap and amenity bottles from the guest room.
- Place them in the bag or container provided.
- At the end of your shift, bring the items to the designated area in Housekeeping. Please remove any plastic bags or wrap around soap before placing it in the bin. The green bin is for soap and the blue bin is for amenity bottles.

- When the bins are at least 75% full, your department head or GM will request a label and replacement bins from Clean the World, and send your full bins to Clean the World.

### Activity:

Have some fun with the team! Gather a variety of soap bars and bathroom amenity bottles, along with your blue and green bins. Hold up each soap and amenity bottle one-by-one and ask the team to call out whether it should go into the blue or the green bin. Alternatively, you can divide the group into two teams and give each a mixed bag of soaps and amenity bottles and have them race to see which team can finish sorting their bag into the right bins first.

Take a picture of your team next to the bins showing their commitment to and excitement about the program and #SoapSavesLives, and post the photo on your Brand Community site or social media channels!

### Resource:

Check out [cleantheworld.org](https://cleantheworld.org) for more information.

### Tip:

Now, soap recycling is a critical part of your room cleaning process. Every time you recycle a bar of soap or amenity bottle, you are helping to save lives! Our commitment is zero soap to landfill, thanks to you!
